Journal of Radioanalytical and Nuclear Chemistry, Articles, Vol. 180, No. 2 (1994) 353–356

Index to Volume 180

No. 1

Nuclear Analytical Methods in Geological and Archaeological Studies

W. C. Mahaney, R. G. V. Hancock, A. MacS. Stalker (North York, Toronto and Lethbridge, Canada)
Geochemical and physical analysis of the bedrock formations and lowest tills at the Wellsch Valley Site, Saskatchewan, Canada 5

P. D. Hays, W. D. James, T. T. Tieh (College Station, TX, USA)
The role of NAA in studies of organic diagenesis of rocks 15

F. Y. Iskander (Austin, TX, USA)
Measurements of 27 elements in garden and lawn fertilizers using instrumental neutron activation analysis 25

M. D. Glascock, H. Neff, K. S. Stryker, T. N. Johnson (Columbia, MO, USA)
Sourcing archaeological obsidian by an abbreviated NAA procedure 29

V. Volterra, R. G. V. Hancock (Toronto, Canada)
Provenancing of ancient Roman millstones 37

Nuclear Analytical Methods in Environmental Studies

L. D. Vela, R. E. Jervis, S. S. Krishnan (Toronto, Canada)
Physical and chemical phenomena affecting the leachability of elements in solid wastes 45

K. K. H. Koh, L. D. Vela, R. E. Jervis, S. S. Krishnan (Toronto, Canada)
Hot atom effect on the leachability of elements in solid waste 49

Automated Data Handling

S. Landsberger, W. D. Cizek, R. H. Campbell (Urbana, Illinois, USA)
NADA92: An automated, user-friendly program for neutron activation data analysis 55

G. W. Haverland (Edmonton, Alberta, Canada)
Porting a peak search program to a PC, non-linear fit testing 65

G. F. Fisher, L. G. I. Bennett (Kingston, Ontario, Canada)
An automated data handling process integrating spreadsheets and word processors with analytical programs 75

V. M. Nazarov, M. V. Frontasyeva, P. A. Lavdanskij, N. I. Stephanov, N. G. Baboshin (Dubna and Moscow, Russia)
NAA for optimization of radiation shielding of nuclear power plants 83

Elsevier Science S. A., Lausanne
Akadémiai Kiadó, Budapest

Radionuclide Studies

T. T. Vandergraaf (Pinawa, Manitoba, Canada)
Radionuclide migration experiments in the laboratory: Some radioanalytical aspects 97

M. L. Smith, H. W. Taylor, H. D. Sharma (Toronto and Waterloo, Canada)
Using γ-ray spectroscopy for the study of Chernobyl fallout on edible mushrooms 109

G. Kennedy, N. Dai (Montréal, Québec, Canada)
Depth profiling of wood preservatives with neutron activation and beta spectroscopy 115

G. F. Fisher, L. G. I. Bennett (Kingston, Ontario, Canada)
Quantitative Filter Debris Analysis (QFDA) as a means of monitoring wear in oil-lubricated systems 121

Chien Chung, Cheng-Chang Chan (Hsinchu, Taiwan, ROC)
Application of BGO detector to monitor in situ ^{16}N concentration in a reactor pool 131

G. Singh, H. S. Virk (Amritsar, India)
Annealing characteristics of nuclear tracks in glass detectors using optical absorption spectroscopy 139

M. M. Bhutani, Ramesh Kumari (New Delhi, India)
Adsorption of low level $^{51}Cr(VI)$ from aqueous solution by bismuth trioxide: Kinetic and IR study 145

M. M. Bhutani, Ramesh Kumari (New Delhi, India)
Sorption and concentration of $^{51}Cr(VI)$ traces on TiO_2 and ZrO_2 by radioindicator study 155

J. J. LaBrecque (Caracas, Venezuela)
The fluctuations of indoor radon measurements from the building materials in a real situation 163

R. W. Sheets, C. C. Thompson (Springfield, MO, USA)
Determination of atmospheric lead-210 by alpha-scintillation counting of air filters 171

J. A. Graudons, F. F. Dyer (Oak Ridge, TN, USA)
Neutron activation analysis of LWR ion exchange mixed-bed resins for ^{129}I 179

R. R. Rao, A. Chatt (Halifax, Nova Scotia, Canada)
Studies on mixed ligand complexes of samarium(III), europium(III) and dysprosium(III) with 1-nitroso-2-naphthol and trioctylphosphine oxide 187

No. 2

Radionuclide Studies (Continued)

J. H. Kaye, R. S. Strebin, A. E. Nevissi (Richland and Seattle, WA, USA)
Measurement of ^{63}Ni in highly radioactive Hanford waste by liquid scintillation counting 197

D. L. Moir (Pinawa, Manitoba, Canada)
Electrodeposition of actinides from saline groundwaters for alpha-spectrometric determination 201

L. G. I. Bennett, A. M. C. Harnden, B. J. Lewis (Kingston, Ontario, Canada)
A transportable gamma spectroscopy system applied to the measurement of fission products 209

C. Chung, S. M. Liu, C. C. Chan, C. N. Hsu (Hsinchu, Taiwan, R. O. C.)
Fall out and radionuclide analysis on the Pratas Island in South China Sea 217

G. J. Evans, W. C. H. Kupferschmidt, R. Portman, A. S. Palson, G. G. Sanipelli (Pinawa, Manitoba, Canada)
Radiochemical analysis of iodine behaviour in the radioiodine test facility 225

R. C. Quan, G. J. Evans (Toronto, Ontario, Canada)
The impact of organic compounds on pH and iodine volatility in nuclear reactor containment structures 237

B. Tugrul, N. Kara (Istanbul, Turkey)
Determination of flow parameters for pipe flows by the radiotracer techniques 245

Nuclear and Related Techniques

E. A. Schweikert, J. F. Welsh (College Station, TX, USA)
New approaches for neutron depth profiling 255

R. L. Paul, R. M. Lindstrom, D. H. Vincent (Gaithersburg, MD and Ann Arbor, Michigan, USA)
Cold neutron prompt gamma activation analysis at NIST: A progress report 263

R. M. Lindstrom, R. L. Paul, D. H. Vincent, R. R. Greenberg (Gaithersburg, MD and Ann Arbor, MI, USA)
Measuring hydrogen by cold-neutron prompt-gamma activation analysis 271

W. D. Ehmann, B-F. Ni, D. L. Samudralwar, M. A. Deibel, Z. Yu (Lexington, KY, USA)
Determination of oxygen, fluorine and boron by 14-MeV INAA: A case of multiple interferences 277

R. H. Filby, S. D. Olsen (Pullman, WA, USA and Stavanger, Norway)
A comparison of instrumental neutron activation analysis and inductively coupled plasma-mass spectrometry for trace element determination in petroleum geochemistry 285

Nuclear Analytical Chemistry Facilities

S. Landsberger (Urbana, Illinois, USA)
Nuclear analytical methods in teaching and research at the University of Illinois 295

J. S. Morris (Columbia, MO, USA)
The Missouri University Research Reactor (MURR) Nuclear Analysis Program 301

W. D. James, J. B. Shapiro, E. A. Schweikert (College Station, Texas, USA)
Nuclear analytical facilities at Texas A&M University 309

A. E. Pidruczny, M. P. Butler, P. C. Ernst, M. F. Collins, J. M. Avelar (Hamilton, Ontario, Canada)
The McMaster University Nuclear Reactor (MNR) research facilities 313

G. C. Lalor, H. Robotham (Kingston, Jamaica)
Multi-disciplinary facilities at the Centre for Nuclear Sciences, U.W.I. 319

S. A. McQuarrie, G. W. Haverland (Edmonton, Alberta, Canada)
Technology transfer programs using a low power nuclear reactor 325

S. Aufreiter, R. G. V. Hancock (Toronto, Canada)
On the use and usefulness of SLOWPOKE-Toronto 331

L. G. I. Bennett, P. A. Beeley (Kingston, Ontario, Canada and London, UK)
The multi-role nature of the SLOWPOKE-2 facility at the Royal Military College of Canada 339

G. Kennedy, J. St-Pierre (Montréal, Québec, Canada)
The neutron activation analysis laboratory at the Ecole Polytechnique de Montréal 347
